performed preventive maintenance, however no Chloro 207/266; 90 used Neutral formalin about 1/2 hour. tried to reduct trigger arm and spring to stop scatter during printing, not to much success. cleaned slide wires.

$$O_2 = \frac{N \times S \times 559.8}{V - 2 \cdot 0.98} = \text{mg/l}$$
 Don, use 5.2 for Thio Normality

20.7
 20.5
 N = ml. thio
 S = Normality
 watch out for contacts on top slide wire that hang up when you close top after cleaning.
